

Topic: Travelling

Activity

Goal/Aim	This activity will focus on the help that is sometimes necessary when traveling. Thanks to the application in the smartphone, we can quickly find the right way.
Duration	approximately 45 minutes
Objectives	Find out how a smartphone can help us orient ourselves in a new environment, find the right way to our destination. Get answers to the following questions: How can our smartphone specifically help us find our way to our destination? Which application is suitable for my device? How to start working with the application and how to control it?
Needed materials	Smartphone with internet connection
Instructions	<p>Divide the participants into groups (2-3 people per group).</p> <p>Choose one local tool (application) that is associated with help that is focused on finding your way to your destination. The assumption is that the start or end point is unknown to the user, so he has never been to this place before.</p> <p>Install and run this tool on the following devices: = Android smartphone, = iOS smartphone</p> <p>Each group can use a different tool / application.</p> <p>Give participants enough time to discuss each step, let them use their own equipment, or entrust the equipment to them.</p> <p>Find answers to the following questions:</p> <ol style="list-style-type: none">1. Where can I find tools / applications for your device?2. Do you already use an application?3. Which application did you choose?4. What do you see as the help of the application? <p>Share the answers so that all groups can hear the answer. Then have participants demonstrate tools / applications to all groups.</p> <p>We will then find the answers to the following questions:</p> <ol style="list-style-type: none">1. What tools / applications are interesting for others?

2. Will you try to use a tool / application on your device?

Summarize all the important conclusions.
